DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of claims 1-8 and 17-44 in the reply filed on 5/7/04 is acknowledged. The traversal is on the ground(s) that "Semiconductor substrates cannot be formed on insulators or metals". This is not found persuasive because as is well known in the semiconductor technology, the semiconductor substrate can be formed on an insulator or metal and vice versa by depositing or thermally growing processes. It is submitted that the Patent Office is not in a position to demonstrate the effectiveness of the materially different process. Also, the traversal is on the ground that "It is not only the Applicant's position, but a physical reality that the product as claimed cannot be made by another and materially different process. The Applicant has not been shown a viable alternative process..." This is also not found persuasive because if the specific order of the steps is important as alleged, then the alternative method proposed by the examiner (in which steps are performed in a different order) would be distinct from that of claims 9-16. It is necessary for the examiner to set forth a distinct alternative method in order to justify the requirement for election. Furthermore, the two inventions appear to be independent and distinct as claimed and there is no evidence of record to show otherwise. In addition, the search is not coextensive as evidences by the different fields of search for the process and product as cited in the restriction requirement.

The requirement is still deemed proper and is therefore made FINAL.

2. This application contains **elected claims 1-8 and 17-44** which are directed to the following patentably distinct species of the claimed invention:

Group I – double-gated device having four terminals as disclosed in Figs. 1-3 and 6.

Group II – a lateral bipolar transistor having no connection to the bottom gate as disclosed in Figs. 4 and 7,

Group III – a DT MOS device having three terminals as disclosed in Figs. 5 and 8.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 17, 28, 31, and 34 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phat X. Cao whose telephone number is (571) 272-1703. The examiner can normally be reached on Monday - Thursday.
